

General

How to add new modules to iBS?

User can add new modules to iBS through different ways

Method 1: iBS Download Manager

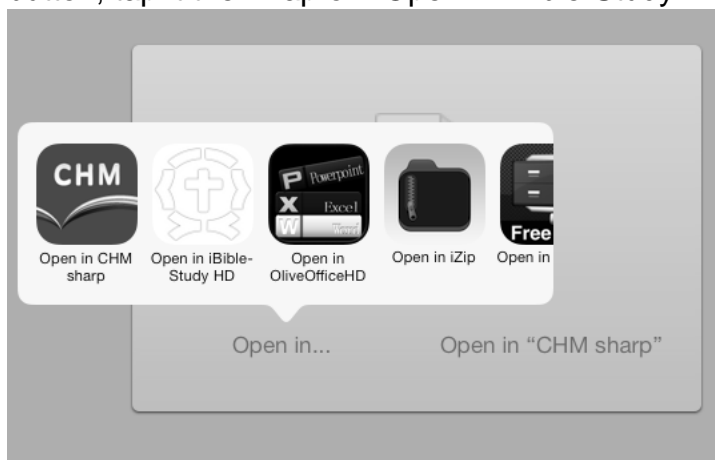

Each module type has its own download manager. so to download a new Bible translation follow the following steps:

- Tap on Bible  tab (tap twice, if the Bible tab is not selected)
- Select Book Popover will appear then tap Download Books button.
- A new list of downloadable books will appear.
- Finde the Bible translation that you need to download then tap the green arrow  to start the download.
- To cancel the download just tap the Bible translation again.
- The download will continue even after closing the popover.

The same goes for the other modules types.

Method 2: Direct Download or eMail Attachments

- By using iPad Safari:
 - Open any site that offers theWord modules downloads (like as wordmodules.com). The modules must be zip or twm format.
 - Download the module.
 - When the browser has finished downloading the module, it will show a "Open In" button, tap it then Tap on "Open in iBible-Study HD" icon.

- iBS will take care of the rest.
- If the module is encrypted, the lock sign  will appear and the module will not open.

General

The same steps can be used with the modules as eMail attachments

Method 3: iTunes file sharing

follow the steps of the following link: <http://support.apple.com/kb/ht4094>
